CORPORATE PROFILE & VISION

A Seamless Supply Chain from Trakya Free Zone to the Heart of Europe

STF Tekstil Co. & PL Tekstil (PL Fashion Group) is a premier ready-to-wear manufacturer and exporter operating since 2008 in the Trakya Free Trade Zone, Istanbul. Combining creative design from our in-house R&D and pattern workshop with our own integrated manufacturing plants and accredited contract sewing network, we deliver an end-to-end full service.

We are the trusted manufacturing partner for top-tier fashion brands primarily across Belgium and France. Benefiting from the duty-free framework of the Free Trade Zone, ATR customs documentation, and immediate overland transit to Western Europe, we offer record-breaking turnaround times from proto-samples to mass shipments.

- ✓ EU Customs Union & ATR Compliant
- ✓ Rapid Sampling & 3D Prototyping (48–72h)
- ✓ 3–5 Days Lead-Time to Belgium & France
- ✓ International AQL 1.5 / 2.5 Quality Assurance

**Trakya Free Trade Zone
Logistics Power**

Strategic European Export Advantages

Zero Customs Duty & Bureaucratic Speed

Duty-free raw material imports under Free Zone status and direct, tax-free fast export to the European Union.

Direct European Highway Corridor

Bordering Bulgaria & Greece; express truck transit delivers across Central Europe in 72–96 hours.

Direct Air Cargo & Seaport Link

25 minutes to Istanbul New Airport Cargo Hub; 35 minutes to Ambarli Deepwater Container Port.

**In-House R&D & Pattern
Atelier**

Proprietary collection design, precision 3D pattern development, and rapid prototyping that bring seasonal trends to life before anyone else.

**Integrated Plants &
Accredited Network**

High-volume, flexible, continuous capacity combining our state-of-the-art facility with rigorously audited partner manufacturing units.

European Social Compliance

Full adherence to BSCI, SEDEX, and OEKO-TEX Standard 100; fair working conditions and verified transparent manufacturing.

Strategic Free Zone Logistics

Direct express road freight of 3–5 days from Istanbul to European central hubs with seamless duty-free customs integration.

FABRIC & MATERIAL CAPABILITIES

Excellence in Material Sourcing and Finishing

We utilize exclusively premium fabrics verified by accredited testing laboratories that meet stringent European ecological standards.

WOVEN SOLUTIONS

Premium Woven Fabrics

Poplin, Twill, Dobby, Voile, Gabardine,
Linen Blends

High-density durable woven structures ensuring dimensional stability, smooth surface texture, and superior color fastness for tailored shirts and fluid blouses.

KNIT & JERSEY

Knitted Fabrics (Knits & Jersey)

Single Jersey, Interlock, Rib, Pointelle,
French Terry

Ultra-flexible, seam-stable combed cotton and elastane blends with pre-shrinkage wash testing for premium t-shirts and soft loungewear.

VISCOSE & MODAL

Viscose, Rayon & Modal Blends

100% Viscose, Viscose Twill, Modal
Jersey, Tencel

Silky fluid hand-feel, cool drape, and high breathability tailored specifically for elegant women's blouses, tops, and flowing dresses.

TECHNICAL BLENDS

Polyester & Performance Blends

Recycled Poly (rPET), Chiffon, Crepe,
Georgette, Microfiber

High crease resistance, easy-care maintenance, and vibrant digital print color retention engineered for modern active lifestyles.

INTEGRATED MANUFACTURING

5-Step End-to-End Production & Quality Ecosystem

From initial pattern sketch to packed sea/truck containers, every stage occurs under strict in-house supervisory control.

01

Design Studio & Pattern Making

R&D / PATTERN MAKING & CAD

Experienced fashion pattern makers utilize Gerber/Lectra CAD workstations to engineer millimeter-precise fit masters and sample prototypes.

02

Automated Spreading & CNC Cutting

HIGH-PRECISION SPREADING & CUTTING

Digital automated tension-free spreading tables and high-ply CNC cutters maximize fabric yield while preventing cut distortions.

03

Garment Assembly & Sewing Lines

LEAN SEWING LINES & SKILLED ASSEMBLY

Over 200 skilled operators along ergonomic line configurations guarantee immaculate stitch density, clean joins, and consistent volume.

04

Fabric Inspection & Quality Control

4-POINT FABRIC INSPECTION & IN-LINE QC

Raw bolts are examined on optical 4-point inspection benches; comprehensive inline QC is enforced following international AQL 1.5/2.5.

05

Final Inspection, Steam Press & Packaging

FORM PRESSING, NEEDLE DETECTION & EXPORT PACK

Centralized industrial steam dummies restore ideal garments shape; 100% metal/needle detection ensures safety before sealed box export.
